Nimrod P. Pala

BS Computer Science student · Full-stack and game developer · Butuan City, Philippines

nimrodpala01@gmail.com | nimrodpala.vercel.app | github.com/N-Shovel | linkedin.com/in/nimrod-pala-273a78342

SUMMARY

Third-year Computer Science student who learns by building. I ship browser games, learning tools, native desktop apps and full-stack web systems, from first commit to live deployment. Open to remote internships and commissions.

EDUCATION

Bachelor of Science in Computer Science · Caraga State University, Butuan City — Expected 2028

Coursework: Data Structures and Algorithms, Algorithms and Complexity, Information Assurance and Security 1, Calculus 1 and 2

PROJECTS

Scrapyard Kingdom · 3D action tower defense game · JavaScript, Three.js, Blender — Play · Code

- Each round has a top-down build phase (turrets, walls, traps) and then a first- or third-person combat phase.
- Enemies pathfind around the player's maze, difficulty scales every round, and the junkyard layout is regenerated.

Folder Tracker v1.2 · native desktop utility for Windows and Linux · C++, Win32, Direct2D, GTK 3, Cairo — Download · Code

- A floating bubble that shows whether each project folder is on GitHub, git-only or untracked.
- Single executable with no installer, about 6 MB of RAM, and versioned releases.

C Visualizers · 3 animated apps for learning C · JavaScript, SVG — Fundamentals · Data Structures · Recursion

- C code runs line by line while memory, pointers and stack frames animate; covers BSTs, heaps, hash tables and recursion.
- One shared animation engine with no dependencies, plus step mode, speed control and an execution log.

PageVoice · offline ebook-to-audiobook desktop app (in development) · Python, Kokoro TTS, ffmpeg, pytest — Code

- Cleans up EPUB, PDF and TXT books, reads them with a neural voice on the CPU, and exports chaptered M4B or MP3.

Portfolio with AI assistant · React 19, Tailwind CSS v4, Vercel serverless, Gemini API — Live · Code

- A serverless chat endpoint answers visitors' questions about my work from a curated knowledge file.

ITE 18 Learning Journey · Three.js, Vite, GitHub Actions — Live

- Showcase of 27 course activities; a CI pipeline builds every demo and deploys it to GitHub Pages.

More: ITE Math Lab (discrete math), Stillness (canvas and Web Audio), Orbit Synth (generative music), Avatar Customizer (Minecraft skin editor in TypeScript and Three.js).

LEADERSHIP AND TEAM EXPERIENCE

Project Leader · Organization Café, Software Engineering 2 team of 3 · React, Supabase — Site · 2026 to present

- Leading a platform for CSU student organizations: a public directory, organization pages, and a fee-clearance lookup.
- Interviewed League of Campus Organizations (LCO) officers, wrote the SRS, co-designed the ERD and Figma prototype.

Frontend Lead · SmartLib CSU, class team project — Live · 2026

- Built the frontend of a library platform designed for CSU: book and thesis search, room reservations, digital borrowing.
- Also took on backend work (Express 5, Supabase) when the backend developer was unavailable. Stack: React 19, Zustand.

Report Lead · Information Assurance and Security 1, team of 2 — 2026

- Writing the report and contingency plan for a Kali Linux penetration test of the Organization Café system.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, C, C++, SQL, HTML, CSS, GDScript, Python (learning)
Frontend	React 19, Tailwind CSS v4, Vite, Zustand, React Router
Backend and data	Node.js, Express, Supabase, PostgreSQL, REST APIs, Vercel serverless functions
Graphics and desktop	Three.js, Canvas 2D, Web Audio API, SVG, Godot 4, Blender, Win32, Direct2D, GTK 3
Tools	Git, GitHub Actions, GitHub Pages, Vercel, Vitest, pytest, Figma
Spoken	English, Filipino
